I have used these filters for years and they are excellent in quality. I have even traveled overseas with them (can't leave the good coffee at home!) and have found myself with too few filters for the number of days in the trip. You guessed it: I rinsed and reused some of the filters and they were perfectly good a second time. The are becoming harder to find in specialty stores, as high-end coffee shops continue to rotate through newer brewing methods than the V60, but for those who still love that brewing method, you can't go wrong with these filters that fit the ceramic cone perfectly. On top of the fit, they're compostable, for those who are concerned with the environmental impact of so much paper use.
